

NIRMAL MANOJ

Kannur, Kerala | nirmalmanojk7@gmail.com | +91 9567423091 | linkedin.com/in/niirmalmanoj | github.com/NiirmalManoj

Professional Summary

Highly motivated Cybersecurity professional specializing in Security Operations (SOC), threat detection, and Governance, Risk, and Compliance (GRC). Combines a strong academic foundation with hands-on experience in log analysis, utilizing SIEM environments, and assessing vulnerabilities using tools like Burp Suite and Nmap. Deeply knowledgeable in enterprise security frameworks, including NIST CSF 2.0 and ISO 27001:2022. Seeking an entry-level SOC Analyst role to apply rigorous defense-in-depth strategies, triage alerts, and align technical controls with organizational compliance requirements.

Technical Skills

- SIEM & Threat Detection: Elasticsearch, Kibana, Log Analysis, Threat Hunting, Alert Triage, IOC Identification, Incident Response.
- Vulnerability & Web Security: Burp Suite (HTTP Manipulation, Input Validation), Nmap, Vulnerability Scanning, OSINT.
- GRC & Frameworks: NIST Risk Management Framework (RMF), NIST CSF 2.0, NIST 800-53 Rev 5, ISO 27001:2022 (Annex A), SOC 2 Auditing, Risk Assessments, Security Controls Mapping.
- Cloud, Virtualization & Architecture: AWS, VMware vSphere, Docker, VirtualBox, Identity & Access Management (IAM).
- Network & Infrastructure: Wireshark, Suricata IDS, TCP/IP, DNS, Linux (Ubuntu/Kali CLI), Basic Python, Regex.

Projects

CyberGuard SIEM & Attack Simulation Lab ELK Stack, Docker, Suricata, VirtualBox	2026-present
- Engineered a 3-VM VirtualBox cyber range (Kali, Victim, SIEM) to deploy a containerized ELK stack and Suricata IDS. - Configured Filebeat for log ingestion and resolved Nginx proxy configurations to ensure continuous telemetry collection. - Simulated live attacks (Nmap, Hydra, SQLMap) to generate network telemetry, actively triaging the resulting alerts in the SIEM.	
Cloud Forensics Automation for Healthcare Data	2025 – 2026
- Implemented a log analysis and threat detection workflow tailored for compliance-heavy healthcare environments. - Created rule-based detection logic utilizing Regex to identify 5+ critical threat categories, including unauthorized access and privilege escalation. - Configured the automated generation of PDF forensic reports to support incident response documentation and GRC audit requirements.	
VAPT & Web Security Assessment Labs Burp Suite, Nmap, Nikto	2026
- Executed vulnerability assessments in isolated lab environments to identify, exploit, and document security flaws in web applications. - Utilized Nmap and Nikto for service enumeration, and configured Burp Suite to intercept HTTP traffic, testing for input validation and authentication vulnerabilities. - Compiled assessment findings to evaluate risk severity and understand attacker methodologies, enhancing threat detection capabilities.	
Biometric Authentication Security Framework Risk Assessment & GRC	2024
- Collaborated on a structured security analysis project evaluating biometric access vulnerabilities and authentication bypass vectors. - Mapped authentication testing procedures against industry-standard access management controls to ensure compliance.	

Security Operations & Home Lab

- Traffic Analysis & Triage:** Utilized Wireshark to capture and analyze network traffic, successfully flagging anomalous DNS query patterns, plaintext credential exposure, and active port scanning.
- Threat Hunting & IOC Correlation:** Conducted independent lab exercises focusing on lateral movement detection, log correlation, and IOC identification.
- Linux Log Analysis:** Leveraged Linux CLI utilities (grep, awk, sed) to navigate file systems, audit user permissions, and extract actionable security events from raw system logs.
- Web Application Security:** Performed isolated lab assessments focusing on HTTP request manipulation, input validation, and session management using Burp Suite and Nmap.

Certifications

- Google Cybersecurity Professional Certificate — Google / Coursera
- Certified LLM Security Expert (CLLMSE) — Red Team Leaders
- Cyber Threat Hunting — Infosec / Coursera
- ISO 27001:2022-Compliant Cybersecurity — LinkedIn Learning
- NIST Cybersecurity Framework (CSF) 2.0 Primer — LinkedIn Learning

Education

Bachelor of Computer Applications (BCA)	2023 – 2026
Yenepoya Institute of Arts, Science and Commerce, Mangalore CGPA: 8.1
